## Advantages

---

- **An ideal proportion to extend the depth of your interior**

To show the best results for your living space, KD has crafted the ideal ratio of 1800mm x 180mm wood flooring. This ratio and exceptional craftsmanship brings both elegance and boldness into your home.

- **Superior quality**

Our choice of raw materials consists of the highest grade of natural wood with clear grain with an average thickness of the top layer being 3mm. KD also controls the moisture content of the surface and substrate carefully during the production process to minimize the possibility of deformation, cracking or instability after installation.

- **Hand-stained, revealing a unique texture in each plank**

Natural wood textures are unique, and by employing manual-staining techniques, every plank of flooring is unique. This labor-intensive process creates a slight variation in tone between each piece, creating a vivid look when installed.

- **Distressed techniques, rustic feels, timeless elegance**

Unlike most manufacturers, each and every craftsman in KD engages in the distressing process manually to create unique and age-worn look similar to vintage flooring.

- **Consistent manufacturing process, demanding for perfection**

Mr. Huang, our Production Director and his full commitment on quality chooses to make each plank flooring hand scraped. By choosing this production method, only 180 sq ft of flooring are made per day. Each plank of flooring made is made like a piece of art.

- **Healthy and environment friendly**

KD is compliant with ISO 9001, ISO 14001 standards and are certified Green Building Materials in Taiwan. These certifications show our commitment to produce safe and healthy products with consistent quality to our clientele.

## Hand-scraped Wood Flooring

The oxidation and fading process of wood is a common and natural phenomenon. However, this reaction is slow and in some cases imperceptible. To avoid any change related to oxidation, KD recommends you to choose dark-toned items for areas that may be exposed to direct sunlight.
